

ADVANTAGES

- Can be used to upgrade existing installations
- Range of standard sizes
- Rapid Adsorption Dynamics (RAD)
- Galvanized steel molecular headered filter
- Ideal for filtering medium concentrations of most gases

Application	Improve indoor air quality (IAQ) by controlling offensive and nuisance odors being drawn into high-rise buildings, offices, shops, sporting arenas, concert halls, hotels, banks, and schools. The filters can be used for both make-up and air recirculation applications.
Frame	Galvanized steel
Media	Synthetic; Activated Carbon
Max Temperature (°C)	50
Relative Humidity max	30% - 70%
Installation Options	Front access frames are available. See related products below.
Comment	Maximum face velocity of 500 fpm.
